July 7, 2009

Dear Resident:

The City of Peoria is preparing to rehabilitate the Water Booster Station located at 8325 West Stone Street. The rehabilitation project will enhance water system reliability and provide an additional water source to the City. This project is being funded through the Water Infrastructure Finance Authority (WIFA) of Arizona and the American Recovery and Reinvestment Act (ARRA) of 2009. This and other projects will help put people back to work and potentially create new jobs.

Work is scheduled to start in late July and it is projected to be completed by Summer of 2010. The majority of the construction will take place inside the facility, but water connections will be necessary at Stone Street. A subsequent project later next year will rehabilitate an existing water line supplying Stone and Edwards Streets.

Access will be maintained for residents, businesses, and emergency vehicles. In addition, please do not move barricades or other traffic signs as they are in place for your protection. We expect minimal traffic impact to this area.

If you have any questions, concerns or need information about the project, please call me at 623-773-7734. The contractor will be posting at the site a 24-hour contact number. In addition, you can visit our website for construction updates at peoria.gov/buildingpeoria or the WIFA website at azwifa.gov for additional information about funding.

Please don't hesitate to call me if you have any questions. Si necesita ayuda en español, también me puede llamar.

Sincerely,

A handwritten signature in black ink, appearing to read "J Setovich".

Javier Setovich
Construction Superintendent
