Re: ANNUAL WATER WITHDRAWAL AND USE REPORT FOR 2011 FOR RIGHT NO. 56-002029.0000

Dear Mr. Craddock:

The City of Peoria has prepared the attached Annual Water Withdrawal and Use Report for 2011 for the City's Service Area Right 56-002029.0000. One paper copy and one electronic copy (on CD) are attached.

The City produced a total of 28,348.19 acre-feet of water in 2011, and delivered a total of 27,283.97 acre-feet, an increase of almost 10% over 2010. The City's percentage of Lost and Unaccounted for Water is thus 3.75%. The City's information on water supply was derived from the Central Arizona Project (CAP), Salt River Project (SRP), and flow meter readings from City wells. With one exception, all wells recovered CAP water stored in the same year. Only one well, 55-569672 ("Quintero"), pumped groundwater and the small amount, 0.14 acre-feet, represents solely purge water during the course of mandatory sampling events. The City's water supply is now largely replenishable.

Water levels reported in Schedule A were measured in February 2012 by the City of Peoria field staff. Wells that were sounded were turned off at least 24 hours in advance of measurement, or had not been pumping for some period of time. Many wells could not be measured due to the nature of the electric sounder and the access tubes on older wells.

New meters were installed on two wells in 2011: well 55-583890 ("Desert Harbor b") and well 55-593411 ("Vistancia 10"). The difference in readings between the old meter and the new is recorded on Worksheet W-1 for both wells.

Well 55-583890 ("Desert Harbor b") represents a unique situation. This well is shared between the City and the Desert Harbor Homeowners Association (HOA). The HOA has legal authority to pump 128.8 acre-feet annually from this well under a Type I Irrigation Grandfathered Right (IGFR), No. 58-112103.0001, owned by the Sun Harbor Community Association. Sun Harbor Community Association later became Desert Harbor HOA.

In May 1986, ADWR issued a Type I IGFR to Sun Harbor Community Association, No. 58-112103.0001. The amount of groundwater which could be legally withdrawn under this IGFR was set at 128.8 acre-feet per year, based on a water duty of three acre-feet per acre for 42.93 acres. The water was to be used for filling a lake and for landscaping. While the total acreage originally irrigated was defined as 161.4 acres, only 42.93 acres were deemed to be non-developable and eligible for the Type I IGFR. This right is still retained by the Desert Harbor HOA.

The 1994 development agreement between the City and the developer of Desert Harbor stipulated that the City would own 92% of the well and the Sun Harbor Community Association would own 8% of the well in order to continue to pump under their Type I IGFR. There appears to be no mathematical connection between the 128.8 acre-feet of legally available groundwater and the 8% of well ownership.

Groundwater was pumped from well 55-617953 under the authority of this IGFR. Well 55-617953 was abandoned in 2001, and a replacement well, 55-583890, was constructed. This replacement well is commonly known as Desert Harbor b. Because it is a replacement well, Desert Harbor continues its 8% ownership stake in the well.

Under the development agreement with the City, Desert Harbor HOA is entitled to the first 128.8 acre-feet pumped from this well under their own right. The City records power usage and flow meter readings, and replaced the flow meter in 2011. In 2011, only 102.90 acre-feet was pumped from 55-583890. All of this water accrues to Desert Harbor HOA under their IGFR, and must be reported separately by them. Because the 128.8 acre-feet limit was not exceeded, the City is reporting zero pumpage for this well under its own Recovery Permit and Service Area Rights. This explains the discrepancy between Schedule A and Worksheet W-1 for this well.

It should be noted that the SRP report for 2011 shows the total amount pumped for the Desert Harbor well, 55-583890, as part of Peoria's pumpage. The City reports all pumpage of all wells to SRP under the Water Delivery and Use Agreement, but SRP is not aware and does not account for the 128.8 acre-feet which goes to the Desert Harbor HOA under their IGFR. Thus the total pumpage shown by SRP and by the City will differ by the amount pumped from this well.

The City has noted that several turf-related facilities are not captured on the pre-printed forms. The City has added these facilities to Schedule F-2, and will continue to report on water usage for these facilities in future years, unless otherwise directed. Note that all but Vistancia and the Quintero golf course are City-owned.

The City has previously noted that Schedule D has errors on the pre-printed form. As discussed above, the Type I IGFR 58-112103.0000 (held by Desert Harbor HOA) has well 55-617953 listed as serving this right, but this well was abandoned in accordance with statute and rule in 2000, and has been replaced by well 55-583890. Also, several years ago recharge permit 64-518541.0000 was closed and the associated well 55-622786 was abandoned; neither should be listed. The City recommends that these entries in the ROGR database be corrected accordingly.

In reporting water production and usage, the City has followed the concept of keeping water sent to recharge separate from water produced for delivery to customers. Schedule A reports all the water recovered from wells which (as discussed above) was all water stored and recovered except for one well that pumped 0.14 acre-feet of groundwater. On Schedule E Part A, water received from SRP is reported under Part 1; all of this water was delivered to customers in the on-Project area of Peoria. These numbers are provided by SRP. On Schedule E Part A, Part II, CAP water directly delivered to the Pyramid Peak Water Treatment Facility and then delivered to customers is reported, as well as water directly delivered to golf courses and turf at Vistancia and Quintero. The total of these three water sources (SRP, CAP, and recovered) is 28,348.19 acre-feet, which is the best representation of water produced for the City's service area. CAP water the City received, untreated, for recharge is not included with the amount that was treated and delivered to customers. This amount of water, 6,910.00 acre-feet, is reported on Schedule E, Part B. Schedule D contains the CAP exchange water transferred to SRP as part of the accounting of on and off-Project water transfers during the annual canal dry-up period; this number was provided by SRP.

The final component is the City's effluent, which is reported on Schedule F-1, Part 3. Part A reports the total amount of effluent produced, 11,207.01 acre-feet. Part B totals the amount of effluent (406.49 acre-feet) directly delivered for non-potable purposes (turf irrigation and a truck wash at the Municipal Operations Center). Part C reports the total amount of effluent recharged, 10,678.91 acre-feet. A small amount of effluent could not be recharged or directly used and was discharged down McMicken Wash, some 135.12 acre-feet, as reported in part D. Parts C and B separate the amounts directly delivered versus the amount sent to recharge, in keeping with the City's concept.

The amounts of water sent for recharge are separately reported in the City's recharge report. Therefore the City has attempted to keep water produced and delivered to customers (reported here) separate from recharge. This basic concept guided preparation of the report.

On Schedule F-1, Part 2, the total water usage of the City is reported. Following the instructions, the amount of effluent directly delivered for non-potable purposes was not included; this amount is reported on Schedule F-1, Part 3, Part B. The total usage by City customers was 27,283.97 acre-feet. Comparing this number with the total amount of water produced for delivery to customers yields a Lost and Unaccounted For percentage of 3.75%. This figure has been consistent over the last few years.

Finally, an explanation is needed for Schedule F-1 Part 1. The numbers reported for housing

units, both single-family and multi-family, differ from numbers reported in past years. During 2010, a comprehensive review of City housing was done using the City's expertise in Geographic Information Systems (GIS). The total change in both numbers for the year is known. Because previous years' figures do not correspond to the GIS analysis, the City assumes that at some point in the past errors were made in estimates of housing units, and these errors persisted over time. It is not clear in which years errors may have occurred, and the City believes it is non-productive at this point in time with the resources currently available to attempt to trace these errors. In this year's report, however, the numbers of changes in housing units going forward should be reliable as it is based on actual Certificates of Occupancy issued during the year. This is a more accurate measure of the number of housing units added than construction permits issued, because not all construction permits result in occupied houses. The total number of Certificates of Occupancy issued in 2011 was 88.

If you have any questions or comments, please contact myself at (623)773-7213 or Alan Dulaney at (623)773-7357.

Sincerely,

Robin E. Bain

Robin E. Bain, P.E., BCEE

ASSURED WATER SUPPLY SUPPLEMENT
FOR DESIGNATED PROVIDERS

ANNUAL REPORT 2011

Pursuant to A.R.S. § 45-632 and the assured and Adequate Water Supply Rules, designated water providers are required to supply the following information. Instructions are listed under each section of this form.

Note: If any information pre-printed on this form is incorrect, please make the needed corrections. For any information not already pre-printed on this form, please follow the directions below. All parts must be completed.

PART 1 - COMMITTED DEMAND

Please provide the estimated future demand in acre-feet for undeveloped, recorded plats that are located in the area as of December 31, 2011. Report demand for residential versus non-residential lots separately.

Number of Residential Lots	Demand per Lot (af/yr)	Total Demand (af/yr)
500	0.52	260
Number of Non-Residential Parcels	Total Demand (af/yr)	
200	*450*	

Explain how the non-residential demand was calculated. Use a separate sheet if necessary.

PART 2 - PROJECTED ANNUAL DEMAND

Project the annual water demand in acre-feet for each year indicated. Calculate the increase in demand each year from the previous year. The projected demand in most cases will be greater than the total water use for the current calendar year. Current year demand should equal the total water deliveries in the service area for 2011 as reported on the Schedule F forms, plus system losses and unaccounted for water. Included all water sources used.

Year	Projected Population	GPCD	Total Production (af/yr)	Increase from Previous Year (af/yr)
2011	154320	153	28348.19	1178.57
2012	155863	153	28631.67	283.48
2013	157422	153	28917.99	286.32
2014	158996	153	29207.17	289.18
2015	162176	153	29791.31	584.14
2016	165419	153	30387.14	595.83
2017	168728	153	30994.88	607.74
2018	172102	153	31614.78	619.90
2019	175544	153	32247.07	632.29
2020	179055	153	32892.02	644.95

PART 3 - WATER QUALITY

A. Is the provider currently in compliance with the Arizona Department of Environmental Quality's State water Quality standards and reporting requirements? [X] Yes [ ] No

B. Have any Superfund or WQARF sites been identified within the provider's service area or having existing contaminant plumes migrated to be within one mile of any service area wells? [ ] Yes [X] No

Please contact the office of Assured and Adequate Water Supply if you need assistance completing this form.

ANNUAL REPORT 2011

PART 4 - TOTAL WATER WITHDRAWN, DIVERTED OR RECEIVED - PHYSICAL AVAILABILITY REQUIREMENT

Please show all sources of water withdrawn, received or divereted in 2011. Refer to Schedule A for the total volume of water withdrawn in 2011. Subtract out deliveries to other rights in the rows indicated below. Water received should match Schedule E. Water delivered should match Schedule D. The total volume of water pumped as reported on Schedule A should match the total water withdrawn on line D.1 in the table below.

The total physically, legally and continuously available supply listed below is provided for your reference:

1.	Total water physically, legally and continuously available per designation order	69117.00	af

A. CAP Water:

1.	CAP received directly (do not include CAP storage credits recovered or CAP stored)	13,086.03	af
2.	CAP delivered directly to other rights (do not inlcude individual user deliveries)	500.00	af
3.	Part 4.A.1 - Part 4.A.2 (total CAP for use within the service area in 2011)	12,586.03	af

B. Surface Water:

1.	Surface water received directly (do not include surface water storage credits recovered or surface water stored)	10051.91	af
2.	Surface water delivered directly to other rights (do not include individual user deliveries)	0.00	af
3.	Part 4.B.1 - Part 4.B.2 (total surface water for use within the service area in 2011)	10051.91	af

C. Effluent:

1.	Effluent received directly (do not include effluent storage credits recovered or effluent stored)	401.89	af
2.	Effluent delivered directly to other rights (do not include individual user deliveries)	0.00	af
3.	Part 4.C.1 - Part 4.C.2 (total effluent for use within the service area in 2011)	401.89	af

D. Water Withdrawn and Groundwater Received for Use in the Service Area in 2011:

1.	Total Water Withdrawn (include water storage credits recovered and exchange water)	5710.25	af
2.	Groundwater Received from other rights	0.00	af
3.	Groundwater delivered to other rights (do not include individual user deliveries)	0.00	af
4.	Part 4.D.1 + Part 4.D.2 - Part 4.D.3 (total withdrawn water and groundwater received 2011)	5710.25	af

Note: Pursuant to the Assured and Adequate Water Supply Rules the director shall consider recovered storage credits when determining physical availability of groundwater.

PART 5. - GROUNDWATER WITHDRAWALS - CONSISTENCY WITH GOAL REQUIREMENT

A. Total Groundwater for Use within the Service Area in 2011

1.	Total from Part 4.D.4 above	5710.25	af
2.	Water Withdrawn as Recovered Long-Term Storage Credits	0.00	af
3.	Water Withdrawn as Recovered Annual Storage Credits	5710.11	af
4.	Part 5.A.1 - Part 5.A.2 - Part 5.A.3 (total groundwater for use in 2011)	0.14	af

B. Groundwater Exemptions:

1.	Total Groundwater from Part 5.A.4 above	0.14	af
2.	Poor Quality Groundwater Withdrawn*	0.00	af
3.	Water Logged Groundwater Withdrawn*	0.00	af
4.	Drought Exemption Groundwater Withdrawn**	0.00	af
5.	Part 5.B.1 above - sum of Parts 5.B.2 through 5.B.4 above	0.14	af
6.	Amount from line 5.B.5 above reported to the CAGRD as Excess Groundwater	0.00	af
7.	Part 5.B.5 above - Part 5.B.6 (groundwater subtracted from allowance account)***	0.14	af

*Note: Poor quality groundwater and water logged groundwater must be listed on the designation order to quaility for subtraction here.
**Note: Drought exemption groundwater must be applied for in writing for each year in which the exemption is requested.
***Note: For information on your groundwater account balance, contact the Office of Assured and Adequate Water Supply.

Please contact the Office of Assured and Adequate Water Supply if you need assistance completing this form.

POPULATION

ANNUAL REPORT 2011

Pursuant to the Third Management Plan, municipal water providers are required to supply the following information. This information is used to determine actual and target GPCD numbers for Large Municipal Providers and for planning information for Small Municipal Providers.

DEFINITION OF A HOUSING UNIT

A housing unit means a group of rooms or a single room occupied as separate living quarters. Examples of a housing unit include a single-family home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multi-family complex. A housing unit may be occupied by a family, a family and unrealted person living together, two or more unrelated persons living together, or by one person. The number of housing units is **not** the number of service connections. Mobile homes in an overnight or limited-stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility are not considered housing units.

SINGLE-FAMILY HOUSING

A single-family housing unit is a detached dwelling. Include mobile homes **not** located in a mobile home park.

Single-Family Housing	Housing United
**Single-family housing unit *(not service connections)* as of July 1, 2010.	2 43,265
Indicate the net change (added and deleted) of single-family housing units *(not service connections)* in your service area between July 1, 2010 and December 31, 2011.	3 88
Total single-family housing units *(not service connections)* as of December 31, 2011.	4 43,353

*****This is revised due to 2010 National Census***

MULTI-FAMILY HOUSING

A multi-family housing unit is a mobile home in a mobile home park or any permanent housing unit having one or more common walls with another housing unit located in a multi-family residential structure, including a unit in a duplex, triplex, four-plex, condominium development, townhouse development or apartment complex. Include mobile homes if they are located in a mobile home park. Do not include mobile homes that are located in an overnight or limited stay mobile home park.

Multi-Family Housing	Housing United
Multi-family housing unit *(not service connections)* as of July 1, 2010.	5 15,994
Indicate the net change (added and deleted) of multi-family housing units *(not service connections)* in your service area between July 1, 2010 and December 31, 2011.	6 0
Total multi-family housing units *(not service connections)* as of December 31, 2011.	7 15,994

* Turf Related Facilities includes turf-related facilities (10 or more acres of turf or other high water use landscaping) and landscaped public rights-of-way identified as Individual Users.

** Other Turf includes water delivered to other turf areas that are less than 10 acres.

*** Other includes unmetered deliveries. Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain in a separate letter how any unmetered deliveries were calculated and to which category it would belong if it were metered, e.g. Industrial, Commercial, etc.

Please contact your local Active Management Area if you need assistance completing this form.

		TOTAL TURF-RELATED WATER USE	63.61

PART 2 - LANSCAPED AND WATER SURFACE AREAS CHANGES

Total turf acreage or precent overseeded 0%

Has there been any lanscape or water surface acreage changes at your facility?

6-310 Monitoring and Reporting Requirements for Turf-Related Facilities: **YES** ☐ **NO** ☒

An industrial user who uses water at a turf-related facility that commences watering to any new turfed acres, low water use landscaped area or water surface acres after January 1, 2011 shall submit to the director documentation of the new acres no later than 90 days after commencement of providing water to the new acres or receiving notice of these conservation requirements, whichever is later. The scale of the submitted douments, extent of turf acres, water surface acres, and low water use landscaped area must clearly be shown.

ARIZONA DEPARTMENT OF WATER RESOURCES

PROVIDER NAME

CITY OF PEORIA

RIGHT/PERMIT NO.

56-002029.0000

2011 ANNUAL SERVICE AREA AND OPERATING DISTRIBUTION SYSTEM UPDATES RESPONSE FORM

Service Area Map Contact Information:

Service Area Map Contact Person Name: Bill Hoover

Address: 8401 W. Monroe St

City: Peoria State AZ ZIP 85345

Phone number: 623-773-7765

Email address: bill.hoover@peoriaaz.gov

Please Return Response Form by March 31, 2012, along with your Annual Water Withdrawal & Use Report

Please check the appropriate boxes:

OPERATING DISTRIBUTION SYSTEM MAP

Were there changes to the operating distribution system since within the last year? (✓) Yes ( ) No

If there were changes to the operating distribution system, what will be the format of the revised maps? Check all that apply.

(✓) An electronic copy of the service area map and operating distribution system submitted with the 2011 Annual Water Withdrawal and Use Report

( ) Upload to ADWR Infoshare website (contact ADWR for insturctinos at (602) 771-8585)

( ) Digital (ArcGIS Shapefiles or a geodatabase file) via an email attachment to pmnagel@azwater.gov

( ) Digital (ArcGIS Shapefiles or a geodatabase file) on a CD/DVD

( ) Hardcopy (If no electronic form exists)

AREA SERVED MAP

Were there changes to the area in service wihtin the last year ? ( ) Yes (✓) No

If there were changes to the area in service, what will be the format of the revised maps? Check all that apply.

( ) Upload to ADWR Infoshare website (contact ADWR for insturctinos at (602) 771-8585)

( ) Digital (ArcGIS Shapefiles or a geodatabase file) via an email attachment to pmnagel@azwater.gov

( ) Digital (ArcGIS Shapefiles or a geodatabase file) on a CD/DVD

( ) Hardcopy (If no electronic form exists)

SUBMIT ALL MAP REVISIONS BY MARCH 31, 2012.
