## ITEMS REQUIRED TO OBTAIN A "GRADING at OWNER'S RISK" PERMIT:

1. The application must be completed and signed by the authorizing agent.
2. City must complete the first review of grading and drainage plans for the proposed development and find that the plans are **substantially** acceptable.
3. The project must have an approved and issued Native Plant Permit from Planning & Zoning.
4. Developer must provide to City two full-size (24"x36") copies and one half-size (11"x17") copy of red lined grading and drainage plans. The red lined plans will alert the City Off-site Inspector that the project has not been approved, but has been reviewed at least one time and also make them aware of the possible changes.
5. City must review and approve the Storm Water Pollution Prevention plan, (SWPPP).
6. Developer must provide to City two copies of the approved Storm Water Pollution Prevention Plan.
7. Developer/contractor must provide a copy of the signed NPDES "Notice of Intent" and construction schedule.
8. Contractor to provide to City one copy of the Maricopa County Rule 310 (Dust Control Permit).
9. Contractor to obtain a "Grading at Owner's Risk" ("At-Risk") permit at a cost of 150% of the actual grading and drainage permit cost, which has a one time "life" of 60-calendar days. The total fee (for the "At-Risk" & final Grading and Drainage permit) will be collected at time of "At-Risk" permit application.
10. Contractor to provide 24-hour emergency telephone and mobile numbers.
11. Contractor shall obtain a Haul Route permit if more than 100-cubic yards of material is to be imported to the site or exported from the site at a cost of \$300 per permit.
12. Obtain an actual grading and drainage permit, within 60-calendar days of the issuance of the "Grading at Owner's Risk" permit and following approval of the grading and drainage plans. The Contractor shall cease construction activities at the site if the grading plans and/or the Final Grading Permit not issued within 60-Calendar Days.

The City will issue a "Grading at Owner's Risk" permit, which is **effective for 60-calendar days** provided that the developer/owner/contractor agree to complete the items listed below. **No other permits such as water, sewer, concrete, dry utilities or paving will be issued until such time as:**

1. All civil drawings are approved by the City; and
2. The grading and drainage permit is obtained; and
3. All fees identified by the plan approval letter have been paid to the City; and
4. The Agreement to Install (Install-A or Install-B) has been executed by the developer, submitted to, and accepted by the City; and
5. The financial guarantee for construction of the project has been posted with the City; and
6. The City has accepted all of the documents (the SLID and MID documents, the Street Light Warranty Agreement); and
7. The City of Peoria Sales Tax license is obtained; and
8. Proof of Insurance is submitted to the City.

If the above mentioned items are not submitted to and accepted by the City within the 60-calendar days (*unless otherwise extended by the City Engineer*), the "Grading at Owner's Risk" permit will be withdrawn and the contractor will be required to return the property to its original condition.

It is hereby acknowledged that this application for a "Grading at Owner's Risk" permit is made prior to Grading and Drainage Plan approval and is done solely at the risk of the owner. Any changes required by the plan review process will be complied with by the owner, at the owner's expense. Owner hereby agrees to hold the City of Peoria harmless from any and all actions of any kind, which result from the issuance of this permit.
