## DECK NEWS

Hunter Contracting has placed bridge girders and now is forming the bridge deck. Construction crews will place concrete for the new deck the middle of this month.

## THINK SAFETY FIRST

Please stay away from the construction site until the project is finished. In addition, obey all traffic signs and signals when driving through the area and watch for traffic changes. Please do not move any barricades. Thank you for your cooperation.

## A STRONG FOUNDATION

This week, the contractor began placing aggregate base course (ABC) on the new westbound travel lanes of Deer Valley Road and the 75th Avenue intersection. Next week, crews will install the base course, or first layer, of asphalt in the same location, weather permitting. Once the base course is installed, the pavement will appear uneven with the gutter. However, the pavement will be evened up when the final layer of asphalt is installed before the completion of the project. As part of the bridge construction project, Hunter Contracting also is installing a storm drain pipe and waterline on the south side of Deer Valley Road between Hillcrest Boulevard and the New River.
