### 21-501 Intent

The non-residential districts are intended to collectively facilitate the development and operation of all types of employment-generating uses, including, but not limited to, retail and service establishments, neighborhood convenience stores, business parks and professional offices, research and development centers, storage warehouses and other light-industrial uses in a manner consistent with the Peoria General Plan.

### 21-502 Zoning Districts

#### A. Office Commercial District (O-1)

The O-1 District is intended to provide an environment conducive to the establishment of professional offices, medical and legal services, and ancillary retail uses. Certain other types of uses are permitted under conditions and standards that ensure their compatibility with surrounding uses as well as nearby residential districts. The O-1 Districts provide for land use transition between more intensive commercial developments and the less intensive residential neighborhoods.

#### B. Convenience Commercial District (C-1)

The C-1 District is intended to accommodate neighborhood-scale retail and service establishments that provide the incidental daily necessities for the local residential areas. This district constitutes the secondary level of neighborhood commercial development. In order to prevent the undesirable "strip" commercial development, it is intended that each development be contiguous

and limited in scale. The C-1 Districts should generally be restricted to the intersection of major arterial streets while providing one-mile separation from other non-adjacent commercial districts. The regulations and development standards are designed to preserve adjacent residential amenities and to prohibit encroachment by more intensive commercial uses.

C. Planned Neighborhood Commercial District (PC-1)

The PC-1 District is intended to accommodate small-scale retail and service establishments that provide the incidental daily necessities for the local residential areas. This district allows for planned neighborhood shopping centers typically having a principal tenant (i.e. supermarket) and an accompanying trade area generally limited to adjacent neighborhoods. It is further intended that PC-1 Districts be restricted to the intersection of selected arterial streets while generally providing one-mile separation from other non-adjacent commercial districts. The regulations and development standards are designed to preserve adjacent residential amenities and to prohibit encroachment by more intensive commercial uses.

D. Planned Community Commercial District (PC-2)

The PC-2 District is intended to accommodate large-scale planned commercial complexes providing comparison shopping goods and services to a community wide and regional trade area. It is further intended that such commercial centers shall be planned, developed and managed as integrated complexes under unified or condominium ownership.

E. Intermediate Commercial District (C-2)

The C-2 District is intended to provide a shopping center for the sale of convenience goods and personal services. In order to prevent the establishment of undesirable "strip" commercial development, it is intended that each development be contiguous and limited in scale. The C-2 districts should generally be restricted to the intersection of major arterial streets while providing one-mile separation from other non-adjacent commercial districts. The regulations and development standards are designed to preserve adjacent residential amenities and to prohibit encroachment by more intensive commercial uses.

F. Central Commercial District (C-3)

The C-3 District is intended to accommodate retail and service establishments in the original plat of Peoria, what is now called the 'Old Town' area. While the C-3 District is intended for buildings to be grouped together in compact arrangements in order to provide maximum shopping convenience and efficient use of off-street parking, the development standards contained herein recognize the existing characteristics of individually owned, small-lot business establishments. The regulations and development standards are designed to preserve adjacent residential amenities and to prohibit encroachment by more intensive commercial uses.

G. General Commercial District (C-4)

The C-4 District is intended to facilitate a wide range of retail, office, service establishments, and other uses not suitable to be located adjacent to residential zones but necessary to accommodate the larger community. This district is particularly suitable along Grand Avenue and Bell Road <sup>\*2</sup> where uses are primarily related to auto-borne clientele and by nature, create a high degree of turning movement.

H. Regional Commercial District (C-5)

The C-5 District is intended to accommodate large-scale commercial establishments or developments that provide goods and services to a community-wide and regional trade area. These districts are typically located along major arterials (typically 110' of right-of-way) or other regional transportation corridors.

I. Business Park Industrial District (BPI)

The BPI District is intended to accommodate the development of office parks, support retail services, warehousing and certain light industrial uses in a comprehensively planned and attractive setting. The regulations and development standards contained within this district include generous screening, landscape buffering and performance standards to ensure compatibility with neighboring districts, particularly when located near residential districts.

J. Planned Light Industrial District (PI-1)

The PI-1 District is intended to accommodate certain industrial structures and uses having physical and operational characteristics that might have potential adverse impacts on adjacent properties. The regulations and development standards are designed to permit those industrial uses which can be operated in a relatively clean, quiet and safe manner, and are compatible with adjoining industrial uses without causing adverse impacts, danger or hazard to nearby non-industrial uses.

K. Light Industrial District (I-1)

The I-1 District is intended to accommodate certain light industrial developments such as manufacturing uses which can be operated in a relatively clean, quiet and safe manner without causing adverse psychological influence or nuisance effects on surrounding property or similar reasons. The regulations and development standards are designed to accommodate, control and limit such special uses for their own protection as well as for protection of the character of surrounding districts.

L. Heavy Industrial District (I-2)

The I-2 District is intended to accommodate certain industrial structures and uses, including large-scale or very specialized industrial operations, having potential adverse environmental impacts on adjoining residential and commercial developments, and, to some extent, the nearby light industrial districts. The regulations and development standards are structured to permit uses involve processing of raw materials and the manufacturing, processing and compounding of semi-finished or finished products.

## 21-503 Land Use Matrix

The following Land Use Matrix (Table 21-503) indicates uses which are permitted outright, conditionally permitted, or prohibited in specific non-residential zoning districts in the City of Peoria. The Land Use Matrix is intended to serve as a guide for the convenience of the user of this Zoning Ordinance. Where the text of this Zoning Ordinance differs from the Land Use Matrix, the text shall prevail. In the event of a specific use not being identified on the matrix, the Community Development Director or designee(s) shall determine the closest associated use based on the provisions of this ordinance. The City will permit any accessory use customarily incidental to a permitted principal use in the same zoning district.
