Sweeper Services

Street sweeping services are performed for three primary purposes:

- 1) To reduce airborne dust and particulate matter (PM-10) generated by heavy traffic, track-out on dirt roads and parking lots, and construction related activities;
- 2) To clear dirt and debris which may be carried along curb and gutter lines into the City's Stormwater System; and
- 3) Aesthetics

The City of Peoria has six pieces of PM-10 certified sweeping equipment. They are in constant rotation between being in service and down for preventative maintenance and repair. There are four Equipment Operators dedicated to sweeping the residential and collector (neighborhood) streets throughout the City; and one Equipment Operator is devoted to sweeping the arterials. Residential sweeping begins at 6:00 a.m., Monday through Friday.

The current street sweeping cycles are as follows:

- 1) Arterial Streets – Every 4 weeks;
- 2) Residential Streets – Every 8-10 weeks

Want to see the approximate date your street will be swept?
