BRIDGE THE GAP

This month, Hunter Contracting will begin placing bridge girders and forming the bridge deck. Next month, construction crews will place concrete for the new deck.

FOCUS ON SAFETY

Speak with your kids about staying away from the construction site until the project is completed. Please obey all traffic signs and signals when driving through the area and watch for traffic changes. Also, allow yourself extra time to get where you are going as there may be delays. In addition, do not move any barricades. Thank you for your patience and cooperation.

NEW FOUNDATIONS

This month, the contractor is placing aggregate base course (ABC) on the new westbound travel lanes of Deer Valley Road between 75th Avenue and Hillcrest Boulevard. ABC is a foundation that is put into place prior to paving. Next, crews will install the base course, or first layer, of asphalt in the same location. Once the paving is finished, crews will begin grading (flattening the dirt) on the new eastbound lanes of Deer Valley Road between 75th Avenue and the New River. Hunter also will install new storm drain pipe on the south side of Deer Valley Road between Hillcrest Boulevard and the New River.
