**RE: City of Peoria- Pipeline Rehabilitation and Repair
Beardsley Road & 111th Avenue**

Dear Resident,

The City of Peoria awarded a contract to Felix Construction to rehabilitate and repair defective sewer segments and manholes in the wastewater collection system located southwest of the intersection of **Beardsley Road & 111th Avenue**. Included in this work is approximately 750 linear feet of trenchless Cured-In-Place-Pipe (CIPP) rehabilitation. This rehabilitation method re-lines the existing sewer with a new material expected to last 50+ years. This requires a full sewer bypass setup to route the wastewater around the sections of pipe being re-lined. The bypass pumping piping will be in a secure, fenced off area just north of the intersection. We are taking measures during construction to ensure that noise and odors related with the bypass pumping will be kept to a minimum. **Construction personnel will be onsite 24 hours to monitor the bypass pumping activities.**

By using this method of trenchless construction, there will be no digging and **no impacts to traffic.**

PROJECT TIMEFRAME

The CIPP process, including the bypass setup, will begin on Monday, July 7th and last approximately four weeks. Work hours will be 24-hours a day until it is completed.

PROJECT CONTACTS

If you have any questions please contact:

City Project Manager
Claudia Christo, P.E.
Main Line: (623) 773-7266
Direct Line: (623) 773-5263
