**Re: ANNUAL WATER WITHDRAWAL AND USE REPORT FOR 2015 FOR SERVICE  
AREA RIGHT NO. 56-002029.0000**

---

Dear Ms. Muse:

The City of Peoria has prepared the Annual Water Withdrawal and Use Report for 2015 for the City's Service Area Right 56-002029.0000. One paper copy and one electronic copy (on flash drive) are attached.

The City produced a total of 28,587.69 acre-feet of potable water in 2015, and delivered a total of 27,325.46 acre-feet. The City's percentage of Lost and Unaccounted for Water is thus 4.4%. This number has been consistent for several years. The City's information on water supply was derived from the Central Arizona Project (CAP), Salt River Project (SRP), and flow meter readings from City wells. Peoria wells recovered CAP water stored in the same year, effluent stored in the same year, and under the SRP Credit Recovery Program, surface water. The City's water supply has been completely replenishable for several years.

In reporting water production and usage, the City has followed the concept of reporting all water produced and received by the City balanced by all water used by the City, including water for recharge purposes. In previous years, the amounts of water sent for recharge were separately reported in the City's water storage report.

As a convenience to the Department of Water Resources, the City has attached the 2015 Annual Letter from SRP which provides details on pumping from SRP direct-connect wells, surface water deliveries, exchanges, and recovery.

Schedule A reports all the water recovered from wells which was water annually stored and recovered. The water pumped from one direct-connect SRP well 55-219594, 396.12 acre-feet, is included. However, this water was reclassified as recovered surface water under the Credit Recovery Program.

On Schedule E Part A, water received from SRP is reported under Part 1; all of this water was delivered to customers in the on-Project lands area of Peoria. For 2015 SRP again reported

“cutback” water as delivered to the City, and this number is included in the totals on Schedule E. As can be seen from the SRP 2015 Annual Letter, these numbers are provided by SRP, and care has been taken to account for these numbers in a manner directed by SRP.

On Schedule E Part A, Part II, CAP water directly delivered to the Pyramid Peak Water Treatment Facility and then delivered to customers is reported, as well as water directly delivered to golf courses and turf at Vistancia and Quintero, and untreated CAP water the City received for recharge. On Schedule E Part A, Part III, CAP water exchanged for SRP water during annual dry-up is recorded. The total of these three water sources (SRP, CAP, and recovered) is 28,587.69 acre-feet, which is the best representation of water produced or diverted for the City’s service area, exclusive of reclaimed water but including non-potable water.

Water levels reported in Schedule A were measured in early 2016 by the City of Peoria field staff. Wells that were sounded were turned off at least 24 hours in advance of measurement, or had not been pumping for some period of time. Many wells could not be measured due to the nature of the electric sounder and the access tubes on older wells. The City is now measuring static water levels on a quarterly basis and more wells than in previous years are being sounded.

- Several wells in Schedule A are direct connect wells owned by SRP, and are so noted. Only one of these wells, 55-219594, had production. Water pumped from this well was re-classified as recovered surface water under the SRP Credit Recovery Program.
- Well 55-583890 (“Desert Harbor b”) represents a unique situation. This well is shared between the City and the Desert Harbor Homeowners Association (HOA). In May 1986, ADWR issued a Type I Irrigation Grandfathered Right (IGFR) to Sun Harbor Community Association, No. 58-112103.0001. The amount of groundwater which could be legally withdrawn under this IGFR was set at 128.8 acre-feet per year, based on a water duty of three acre-feet per acre for 42.93 acres. The water was to be used for filling a lake and for landscaping. While the total acreage originally irrigated was defined as 161.4 acres, only 42.93 acres were deemed to be non-developable and eligible for the Type I IGFR. This right is still retained by the Community, which has since been renamed “Desert Harbor.”

The 1994 development agreement between the City and the developer of Desert Harbor stipulated that the City would own 92% of the well and the Sun Harbor Community Association would own 8% of the well in order to continue to pump under their Type I IGFR. There appears to be no mathematical connection between the 128.8 acre-feet of legally available groundwater and the 8% of well ownership.

Groundwater was pumped from well 55-617953 under the authority of this IGFR. Well 55-617953 was abandoned in 2001, and a replacement well, 55-583890, was constructed. This replacement well is commonly known as Desert Harbor b. Because it is a replacement well, Desert Harbor continues its 8% ownership stake in the well.

Under the development agreement with the City, Desert Harbor is entitled to the first 128.8 acre-feet pumped from this well under their own right. The City records power usage and flow meter readings. In 2015, the first 128.8 acre-feet pumped from 55-583890 accrue to

Desert Harbor under their IGFR, and must be reported separately by them. The City is reporting pumpage of 60.46 acre-feet for this well under its own Recovery Permit and Service Area Rights. This explains any discrepancy between Schedule A and Worksheet W-1 for this well.

Note that the water pumped from this well is non-potable due to high arsenic levels, and is not put into the City-wide delivery system for potable water. The water is used to fill the Desert Harbor lake, a non-potable use. When calculating the amount of water used in Schedule F-1 Part 2, the pumpage from this well was included for non-potable purposes.

- Well 55-565552 also produces non-potable water. Water recovered from this well is delivered to the Peoria Sports Complex for non-potable purposes such as ball fields and landscaping. This water is counted as non-potable in Schedule F-1 Part 2. Both this well and the Desert Harbor b well are denoted on Schedule A and Worksheet W-1 as non-potable.
- Only one well, 55-565171 (Patterson b), had a meter replaced. This was noted in Worksheet W-1.
- Well 55-622786 ("Stone") is mis-identified on several pre-printed forms as 55-532530. The following explanation was entered into the Wells55 Database by Mike Ball in 2010:

On 6/10/82, the City of Peoria (COP) registered this well (aka Stone Well #1) and was assigned 55-622786. At the time of registration, COP failed to provide ADWR any useful well data such as depth of well, depth and diameter of casing, depth to water, date well completed, etc. On 1/20/89, ADWR issued a Recharge Project Permit (64-518541) with this well identified as the permitted "injection" well. On 7/17/91, COP filed a NOID to DEEPEN this well. Due in part to a policy in effect at this time, instead of retaining the original well number, ADWR issued a drill card with 55-532530 as the new well number. Shortly after the issuance of 55-532530, the policy of issuing a new number whenever a well was deepened or modified was rescinded. The authority to deepen this well was issued to B.L. Weber Group #215. The Well Drillers Report that was submitted by Weber on 12/28/92 indicated that the well had been deepened from a depth of 506-ft to a depth of 1129-ft. Well was cased with 14" dia. steel from the surface to 1128-ft. Depth to water (1992) was at 219-ft. Casing was perforated with 48 3/16" x 2-1/2" cuts/ft from 560-1110 feet. According to the pump installation completion report, the well was equipped with a 200-hp electric turbine pump with a discharge rate of 1000-gpm. On 6/2/10, the Maricopa County Environmental Services Dept (MCESD) issued a New Groundwater Source Approval to COP (PWS # 07-096) with this well (55-532530, local name Stone) identified as the source. As 55-532530 is a duplicate registration of 55-622786, and 55-622786 is the legally correct number assigned to the "Stone" well, the two well files were merged into 55-622786 leaving 55-532530 to be cancelled. File update conducted 6/11/10.

The City suggests that the well number correction be entered into the ROGR database for this well for future years.

The City has previously noted that several turf-related facilities are not captured on the pre-printed forms. The City has added these facilities to Schedule F-2, and will continue to report on water usage for these facilities in future years, unless otherwise directed. Note that all but Vistancia and the Quintero golf course are City-owned.

Schedule D reports amounts of water delivered to other rights, specifically, CAP water delivered to storage facilities for recharge purposes. The total amount of CAP water recharged, 8,909.00 acre-feet, is also shown on other forms. Schedule D also contains the CAP exchange water transferred to SRP as part of the accounting of on- and off-Project water transfers during the annual canal dry-up period; this number (737.82 acre-feet) was provided by SRP. Please note that these exchange amounts do not represent additional water received by the City, but serve merely to correctly account for categories of water transferred on paper between on-Project and off-Project areas of the City. The water remained within the City's service area.

Schedule F-1 Part 1 reports the net change of housing units for the fiscal year July 1, 2014 to June 30, 2015. Only 1,081 single-family residences were added, and no multi-family units.

On Schedule F-1, Part 2, the total water usage of the City is reported. Following the instructions, the amount of effluent directly delivered for non-potable purposes was not included; this amount is reported on Schedule F-1, Part 3. The total potable usage by City customers was 26,872.58 acre-feet. Non-potable deliveries amounted to 452.88 acre-feet. The total sum of both was 27,325.46 acre-feet. Comparing this number with the total amount of water produced for delivery to customers, 28,567.69 acre-feet, yields a Lost and Unaccounted For percentage of 4.4%. The range of this figure has been consistent over the last several years.

The final component is the City's reclaimed water, which is reported on Schedule F-1, Part 3 (new form) and Part 3a (old form). On Schedule F-1, Part 3 the total amount of reclaimed water (treated effluent) produced by the City's three Water Reclamation Facilities is reported in Part 1. In Part 2, uses of reclaimed water for recharge, landscaping, and other purposes are shown. The total amount of reclaimed water discharged was 85.73 AF. Finally, an older form (Schedule F-1 Part 3A) is attached to show reclaimed water deliveries from each of the Water Reclamation Facilities.

A map of the City's service area is also attached electronically as a pdf file.

If you have any questions or comments, please contact me at (623)773-7213, Petra Zaleski at (623)773-5152, or Alan Dulaney at (623)773-7357.

Sincerely,

A handwritten signature in cursive script that reads "Robin E. Bain".

# SCHEDULE F-1 PART 1

## HOUSING UNITS AND POPULATION

### ANNUAL REPORT 2015

Pursuant to the Third Management Plan, municipal water providers are required to supply the following information. This information is used to determine actual and target GPCD numbers for Large Municipal Providers and for planning information for Small Municipal Providers.

#### DEFINITION OF A HOUSING UNIT

A housing unit means a group of rooms or a single room occupied as separate living quarters. Examples of a housing unit include a single-family home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multi-family complex. A housing unit may be occupied by a family, a family and unrelated person living together, two or more unrelated persons living together, or by one person. The number of housing units is **not** the number of service connections. Mobile homes in an overnight or limited-stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility are not considered housing units.

#### SINGLE-FAMILY HOUSING

A single-family housing unit is a detached dwelling. Include mobile homes **not** located in a mobile home park.

#### MULTI-FAMILY HOUSING

A multi-family housing unit is a mobile home in a mobile home park or any permanent housing unit having one or more common walls with another housing unit located in a multi-family residential structure, including a unit in a duplex, triplex, four-plex, condominium development, townhouse development or apartment complex. Include mobile homes if they are located in a mobile home park. Do not include mobile homes that are located in an overnight or limited stay mobile home park.

#### GROUP QUARTERS POPULATION

Group quarters means living quarters occupied by one or more people under care or custody, such as orphanages, nursing homes and prisons, or quarters such as college dormitories, fraternity or sorority houses, nurses dormitories, rooming houses, hotels with permanent residents and congregate housing for the elderly.

Housing Units (Not service connections)	Single-Family	Multi-Family	Group Quarters
Total Housing units or group quarter population as of July 1, 2014	2 46,732	5 15,184	8 0
Indicate the net change (added and deleted) of housing units or group quarter population between July 1, 2014 and July 1, 2015.	3 1,081	6 0	9 0
Total housing units as of July 1, 2015.	4 47,813	7 15,184	10 0

\* Turf Related Facilities includes turf-related facilities (10 or more acres of turf or other high water use landscaping) and landscaped public rights-of-way identified as Individual Users.

\*\* Other Turf includes water delivered to other turf areas that are less than 10 acres.

\*\*\* Other includes unmetered deliveries. Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain in a separate letter how any unmetered deliveries were calculated and to which category it would belong if it were metered, e.g. Industrial, Commercial, etc.

\*\*\*\* Report any deliveries of non-potable or untreated water including groundwater, surface water, CAP water and effluent or recovered effluent to turf related facility or for any other purpose, such as dust control or other turf use.

Please contact your local Active Management Area if you need assistance completing this form.

### PART 2 - LANDSCAPED AND WATER SURFACE AREAS CHANGES

Total turf acreage or percent overseeded \_\_\_\_\_ 0%

Has there been any landscape or water surface acreage changes at your facility?

6-310 Monitoring and Reporting Requirements for Turf-Related Facilities: YES  NO

An industrial user who uses water at a turf-related facility that commences watering to any new turfed acres, low water use landscaped area or water surface acres after January 1, 2015 shall submit to the director documentation of the new acres no later than 90 days after commencement of providing water to the new acres or receiving notice of these conservation requirements, whichever is later. The scale of the submitted documents, extent of turf acres, water surface acres, and low water use landscaped area must clearly be shown.

## ASSURED WATER SUPPLY SUPPLEMENT FOR DESIGNATED PROVIDERS ANNUAL REPORT 2015

Designated Provider

City of Peoria

Right No.

56-002029.0000

Pursuant to A.R.S. § 45-632 and the assured and Adequate Water Supply Rules, designated water providers are required to supply the following information. Instructions are listed under each section of this form.

Note: If any information pre-printed on this form is incorrect, please make the needed corrections. For any information not already pre-printed on this form, please follow the directions below. All parts must be completed.

### PART 1 - COMMITTED DEMAND

Please provide the estimated future demand in acre-feet for undeveloped, recorded plats that are located in the area as of December 31, 2015. Report demand for residential versus non-residential lots separately.

Number of Residential Lots	Demand per Lot (af/yr)	Total Demand (af/yr)
1,141	0.52	593
Number of Non-Residential Parcels	Total Demand (af/yr)	
8	18	

Explain how the non-residential demand was calculated. Use a separate sheet if necessary.

### PART 2 - PROJECTED ANNUAL DEMAND

Project the annual water demand in acre-feet for each year indicated. Calculate the increase in demand each year from the previous year. The projected demand in most cases will be greater than the total water use for the current calendar year. Current year demand should equal the total water deliveries in the service area for 2015 as reported on the Schedule F forms, plus system losses and unaccounted for water. Included all water sources used.

Year	Projected Population	GPCD	Total Production (af/yr)	Increase from Previous Year (af/yr)
2015	160,242	159	28,587.69	(460.51)
2016	162,646	159	28,873.57	285.88
2017	165,085	159	29,162.30	288.74
2018	167,562	159	29,453.93	291.62
2019	170,075	159	29,748.46	294.54
2020	172,626	159	30,045.95	297.48
2021	175,216	159	30,346.41	300.46
2022	177,844	159	30,649.87	303.46
2023	180,511	159	30,956.37	306.50
2024	183,219	159	31,265.94	309.56

### PART 3 - WATER QUALITY

A. Is the provider currently in compliance with the Arizona Department of Environmental Quality's State water Quality standards and reporting requirements?  Yes  No

B. Have any Superfund or WQARF sites been identified within the provider's service area or having existing contaminant plumes migrated to be within one mile of any service area wells?  Yes  No

**SCHEDULE AWS****ASSURED WATER SUPPLY SUPPLEMENT

**PART 4 - TOTAL WATER WITHDRAWN, DIVERTED OR RECEIVED - PHYSICAL AVAILABILITY REQUIREMENT**

Please show all sources of water withdrawn, received or diverted in 2015. Refer to Schedule A for the total volume of water withdrawn in 2015. Subtract out deliveries to other rights in the rows indicated below. Water received should match Schedule E. Water delivered should match Schedule D. The total volume of water pumped as reported on Schedule A should match the total water withdrawn on line D.1 in the table below.

The total physically, legally and continuously available supply listed below is provided for your reference:

1.	Total water physically, legally and continuously available per designation order	69,117.00	af
----	--	-----------	----

**A. CAP Water:**

1.	CAP received directly (do not include CAP storage credits recovered or CAP stored)	20,616.00	af
2.	CAP delivered directly to other rights (do not include individual user deliveries)	8,909.00	af
3.	Part 4.A.1 - Part 4.A.2 (total CAP for use within the service area in 2015)	11,707.00	af

**B. Surface Water:**

1.	Surface water received directly (do not include surface water storage credits recovered or surface water stored)	10,124.98	af
2.	Surface water delivered directly to other rights ( do not include individual user deliveries)	0.00	af
3.	Part 4.B.1 - Part 4.B.2 (total surface water for use within the service area in 2015)	10,124.98	af

**C. Effluent:**

1.	Effluent received directly (do not include effluent storage credits recovered or effluent stored)	11,342.56	af
2.	Effluent delivered directly to other rights ( do not include individual user deliveries)	10,601.55	af
3.	Part 4.C.1 - Part 4.C.2 (total effluent for use within the service area in 2015)	741.01	af

**D. Water Withdrawn and Groundwater Received for Use in the Service Area in 2015:**

1.	Total Water Withdrawn (include water storage credits recovered and exchange water)	6,755.71	af
2.	Groundwater Received from other rights	0.00	af
3.	Groundwater delivered to other rights (do not include individual user deliveries)	0.00	af
4.	Part 4.D.1 + Part 4.D.2 - Part 4.D.3 (total withdrawn water and groundwater received 2015)	6,755.71	af

Note: Pursuant to the Assured and Adequate Water Supply Rules the director shall consider recovered storage credits when determining physical availability of groundwater.

**PART 5. - GROUNDWATER WITHDRAWALS - CONSISTENCY WITH GOAL REQUIREMENT****A. Total Groundwater for Use within the Service Area in 2015**

1.	Total from Part 4.D.4 above	6,755.71	af
2.	Water Withdrawn as Recovered Long-Term Storage Credits	0.00	af
3.	Water Withdrawn as Recovered Annual Storage Credits	6,755.71	af
4.	Part 5.A.1 - Part 5.A.2 - Part 5.A.3 (total groundwater for use in 2015)	0.00	af

**B. Groundwater Exemptions:**

1.	Total Groundwater from Part 5.A.4 above	0.00	af
2.	Poor Quality Groundwater Withdrawn*	0.00	af
3.	Water Logged Groundwater Withdrawn*	0.00	af
4.	Drought Exemption Groundwater Withdrawn**	0.00	af
5.	Part 5.B.1 above - sum of Parts 5.B.2 through 5.B.4 above	0.00	af
6.	Amount from line 5.B.5 above reported to the CAGR as Excess Groundwater	0.00	af
7.	Part 5.B.5 above - Part 5.B.6 (groundwater subtracted from allowance account)***	0.00	af

\*Note: Poor quality groundwater and water logged groundwater must be listed on the designation order to qualify for subtraction here.

\*\*Note: Drought exemption groundwater must be applied for in writing for each year in which the exemption is requested.

\*\*\*Note: For information on your groundwater account balance, contact the Office of Assured and Adequate Water Supply.

Please contact the Office of Assured and Adequate Water Supply if you need assistance completing this form.

**SCHEDULE S****SERVICE AREA MAP UPDATE  
ANNUAL REPORT 2015**

Pursuant to A.R.S. §45-498 each city, town, private water company and irrigation district in an active management area shall maintain a current map clearly delineating its service area and distribution system in the director's office and shall furnish such other related data as the director may require.

**2015 ANNUAL SERVICE AREA AND OPERATING DISTRIBUTION SYSTEM UPDATES RESPONSE FORM**

Please complete and return THIS FORM along with your UPDATED DISTRIBUTION SYSTEM (WATER LINE) MAP AND WATER SERVICE AREA BOUNDARY MAP TO ADWAR BY MARCH 31, 2016 along with your 2015 ANNUAL WATER WITHDRAWAL & USE REPORT.

**Service Area Map Contact Information:**

If the contact person in your office for service area map updates has changed in the last year, please email ADWR with the updated contact person information. Please send that information to [data\\_management@azwater.gov](mailto:data_management@azwater.gov).

**Please check the appropriate boxes:****OPERATING DISTRIBUTION SYSTEM MAP**

Your **operating distribution system** includes your water lines, wells, storage tanks, water treatment facilities and related infrastructure used to treat and distribute water to your customers. If you have added any new water lines, wells, treatment or storage facilities over the last calendar year, please submit an updated map.

Were there changes to the operating distribution system within the last year?  Yes  No

**WATER SERVICE AREA BOUNDARY MAP**

Your **service area boundary** is an area delineated as a 100 foot buffer around the exterior of your water lines, excluding any small municipal providers, other large municipal providers, or areas that you do not serve (exempt domestic well areas) within the exterior boundary of your water lines.

Were there changes to the area in service within the last year?  Yes  No

If there were changes to either your operating distribution system or your water service area boundary, please submit an updated map(s) in one of the following formats:

- \* Digital ArcGIS Shapefile
- \* Digital ArcGIS geodatabase file
- \* Digital AutoCAD file
- \* pdf File
- \* Hardcopy (if no electronic form exists)

**SUBMIT ALL MAP REVISIONS BY MARCH 31, 2016. IF YOU WOULD LIKE TO SUBMIT YOUR MAP BY UPLOADING TO ADWR's ftp or Infoshare websites, please call the Active Management Area at (602) 771-8585 or email us for instructions at [data\\_management@azwater.gov](mailto:data_management@azwater.gov).**
