

## CHAPTER 25 – WATER, SEWERS AND SEWAGE DISPOSAL

### Sec. 25-143. Preliminary treatment -- Required Approval.

(a) Where necessary in the opinion of the director, any user of the sewer system shall provide, at his or her expense, such preliminary treatment as may be necessary to reduce objectionable characteristics or constituents to within the maximum limits provided for in this chapter. Plans, specifications and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the director. No construction of such facilities shall be commenced until the director's approval is obtained in writing. The completed facilities shall not be placed in service until they have been inspected for conformance to the approved plans and the final construction approved by the director. The approval of the plans and inspection of construction shall not relieve the owner from complying with discharge limitations set forth in this chapter.

(b) Where preliminary pretreatment facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his or her expense. The owner shall keep written records and documentation of all cleaning, repair, calibration and maintenance required to demonstrate compliance with this section. Records shall be kept at the facility and made available to the Director upon request.
