

CHAPTER 25 – WATER, SEWERS AND SEWAGE DISPOSAL

Sec. 25-150. Monitoring Facility.

(a) The city shall require to be provided and operated at the user's own expense, monitoring facilities to allow inspection, sampling, and flow measurements of the building sewer and/or internal drainage systems. The monitoring facility should normally be situated on the user's premises, but the city may, when such a location would be impractical or cause undue hardship on the user, allow the facility to be constructed in the public street or sidewalk area and located so that it will not be obstructed by landscaping or parked vehicles.

(b) There shall be ample room in or near such sampling manholes or facilities to allow accurate sampling and preparation of samples for analysis. The facility, sampling, and measuring equipment shall be maintained at all times in a safe and proper operating condition at the expense of the user.

(c) Whether constructed on public or private property, the sampling and monitoring facilities shall be provided in accordance with the City's requirements, and all applicable local construction standards and specification. Construction shall be completed within 90 days following written notification by the city.
