INTRODUCTION

La Jolla Groves is a proposed 47-lot single-family residential subdivision. This project is comprised of approximately 16.5 acres located south of the southwest corner of Olive Avenue and 95th Avenue. This project is being developed adjacent to the 40-acre, 126-lot Erin Groves subdivision located at the northwest corner of Butler Drive and 95th Avenue. A common local street will connect both projects.

Lo Jolla Landing is a proposed 18.56-acre commercial development. The development is located at the southwest corner of Olive Avenue and 95th Avenue.

See APPENDIX A for the property legal descriptions and exhibits.

CONSISTENCY WITH GENERAL PLAN

The proposal for the rezoning of La Jolla Groves is consistent with the City of Peoria Land Use Plan. The land is currently zoned PC-2 and R1-12. This proposal is to establish the hard zoning for the R1-12 and the rezoning of 12.58 acres of PC-2 to R1-8. The City of Peoria General Plan designates this project area as Low-Density Residential. Therefore, this is a case where existing zoning (PC-2) is not in conformance with the General Plan. The rezoning of PC-2 to R1-8 will bring that portion of the project into compliance with the General Plan.

The La Jolla Groves project is compatible with the surrounding land uses and zoning patterns, namely the Erin Groves project located adjacent to the south. The R1-12 lots border 95th Avenue. Their larger size and front facing scheme compliment the west Olive Farms neighborhood on the east side of 95th Avenue. The overall density of this project is 2.85 dwelling units per acres, which is below the target density of 3.0 dwelling units per acre as set forth in the City of Peoria General Plan guidelines.

The La Jolla Landing project area is currently zoned PC-2 and O-1. This proposal is to establish the rezoning of PC-2 and O-1 to C-2. This property had been zoned prior to adoption of the General Plan. This rezoning is to simply request the change from the current PC-2 to a C-2 zoning designation. Due to the large setbacks required by PC-2 zoning, the rezoning from PC-2 to C-2 is necessary in order to convert the 12.58 acres mentioned above to R1-8 (thus bringing that portion of the site into conformance with the General Plan) and allow the remaining commercial parcel to be developed with a commercial shopping center. In the past the rezoning of the 18.56 acres to C-2 would have required a General Plan Amendment. However, based on the General Plan Text Amendment, being proposed by City staff in June 2002, this project will not require an amendment to the General plan provided that City Council approves the Text Amendment. Therefore, once the Text Amendment is approved the La Jolla Landing commercial site will meet the goals and policies of the Peoria General Plan.

GENERAL SITE INFORMATION AND EXISTING SITE CONDITIONS

The site is currently fallow, agricultural land. The site is bordered on the north by Olive Avenue and on the east by 95th Avenue. An RV-Storage facility is adjacent to the west of the site. Erin Groves, a single-family residential subdivision, is being constructed immediately south of the site.

The La Jolla Groves project was submitted to the City in 1999 for rezoning and preliminary plat approval under the name of Erin Groves II. The project was not granted approval in June of 2000 due to neighborhood concerns over the additional traffic generated by the project. The concern was that the existing roadway infrastructure in the immediate site vicinity would not be able to safely handle the additional traffic generated by the project. An additional outlet for local neighborhood traffic will be created by the North Village Estates project with the construction of the half street on Butler Drive between 97th and 99th Avenues. This additional roadway outlet will relieve some of the neighborhood traffic on 95th Avenue and alleviate the concerns that were raised with the Erin Groves II project.

See APPENDIX B for the vicinity map and zoning maps.

PERMITTED CONDITIONAL AND ACCESSORY USES

The total site acreage is 35.06 acres.

	Area (Ac)	% of Total Acreage
Proposed Commercial (Rezoning to C-2)	18.56	53%
Proposed Single-Family Residential (Rezoning to R1-8)	12.58	36%
Existing R1-12 Single-Family Residential	3.92	11%

The permitted conditional uses for the single-family residential are those listed in Section 14-5-3 of Article 14-5 of the City of Peoria Zoning Ordinance. The permitted accessory uses are those listed in Section 14-5-4 of Article 14-5 of the City of Peoria Zoning Ordinance.

The permitted conditional and accessory uses for the C-2 area are listed in Sections 14-13-3 and 14-13-4, respectively, of Article 14-13 of the City of Peoria Zoning Ordinance. The La Jolla Landing Commercial project will not be platted at this time. A site plan will be submitted to the City for review and approval at the time of development. The developer shall require design review approval prior to issuance of any building permits. The commercial site will need to meet the standards as set forth

in the Design Review Manual at the time of development. Please see Exhibit 3 for the Preliminary Development Plan for this project.

PROJECT PHASING AND DEVELOPMENT SCHEDULE

The La Jolla Groves residential project will be developed in one phase.

As stated above, the La Jolla Landing Commercial project will not be developed at this time. It is anticipated that this project will likely be developed within 5 to 10 years based on the demand of the existing residential developments and those that will be constructed in the future. When La Jolla Landing is developed it is likely that it will occur in one phase.

PROJECT DEVELOPMENT STANDARDS

La Jolla Groves

The following table lists the development standards for the permitted residential uses as set forth in Section 14-5-5 of Article 14-5 of the City of Peoria Zoning Ordinance.

LAND USE	R1-8	R1-12
GROSS AREA (AC)	12.58	3.92
FRONT SETBACK (ft)	20	20
REAR SETBACK (ft)	15	15
MIN. SIDE SETBACKS (ft)	5 & 10	5 & 10
MIN. FRONT LOT WIDTH (ft)	70	70
MIN. LOT SIZE (sf)	8,000	12,000
OPEN SPACE REQUIRED (AC)*	1.38	0.35
OPEN SPACE PROVIDED (AC)	1.40	0.37
MAX. LOT COVERAGE (%)	40	35

*The open space requirement for R1-8 is 11% and for R1-12 is 9%.

The permitted conditional and accessory uses are those set forth in Sections 14-5-3 and 14-5-4, respectively, of Article 14-5 of the City of Peoria Zoning Ordinance. The development standards for the permitted conditional and accessory uses are as set forth in Sections 14-5-6 and 14-5-7, respectively, of Article 14-5 of the City of Peoria Zoning Ordinance. The La Jolla Groves development will comply with Design Review requirements and considerations for Single Family residential developments. The developer shall require design review approval prior to issuance of any building permits.

Community residential setting facilities, group homes, and group care facilities can be developed at this site in a manner consistent with state law and the federal fair housing act amendments of 1988 per City of Peoria Zoning Ordinance 97-41 and Sections 14-5-

3H and 14-13-3M of the City of Peoria Zoning Ordinance.

La Jolla Landing

The La Jolla Landing development will comply with Design Review requirements and considerations for commercial developments. The developer shall require design review approval prior to issuance of any building permits.

The following table lists the development standards for the permitted principle uses as set forth in Section 14-13-5 of Article 14-13 of the City of Peoria Zoning Ordinance.

LAND USE	C-2
GROSS AREA (AC)	18.56
FRONT SETBACK (ft)	15
REAR SETBACK (ft)	20
MIN. SIDE SETBACKS (ft)	10
MAX. BUILDING HEIGHT (ft)	36*
OPEN SPACE REQUIRED (AC)	0.93
MAX. LOT COVERAGE (%)	**

*A variance will be required to exceed this height.

**Determined as set forth in Section 14-13-5.A of Article 14-15 of the City of Peoria Zoning Ordinance.

The permitted conditional and accessory uses are those set forth in Sections 14-13-3 and 14-13-4, respectively, of Article 14-13 of the City of Peoria Zoning Ordinance. The development standards for the permitted accessory uses are as set forth in Section 14-13-6 of Article 14-13 of the City of Peoria Zoning Ordinance.

A contemporary neighborhood village should be the shopping center design theme. Using fundamental principles of design, such as proportions, hierarchy, color, texture, and spatial quality will help create a timeless contemporary neighborhood center. With a synthesis of texture, color, spatial quality and enhanced hardscape/landscape design, offers the pedestrian and patron a visually rich journey of changing exterior views. Warm and vibrant colors should be used in conjunction with integral color concrete CMU, decorative steel for canopy awnings and sensitive detailing. The intense use of river rock, cultured stone and mission tile should be avoided because of the tendency to be stylistic and timely.

The open space at La Jolla Landing should incorporate some of the following features: a shaded pedestrian footpath between pad buildings and major anchors, plaza areas for outdoor dining and/or entertainment, landscaped seating areas, landscaped pedestrian path between head-in parking stalls and building to provide a nice buffer typical of a neighborhood village theme. The amenities should be designed in such a way to enhance the shopping experience. Such amenities could include: decorative bench seating, decorative trash and ash receptacles, decorative pedestrian light poles

near footpaths, landscape accent lights, outdoor seating for dining, architectural features such as canopy awning or tower element at the end of the drive entry to accent the corner, bike racks, and landscape pots. Screen walls should be used for shopping cart screening and parking lot screening.

PROJECT SIGNAGE STANDARDS

The project signage for both La Jolla Groves and La Jolla Landing will meet the City requirements at the time of development. The La Jolla Groves project signage shall consist of stained, single score split face block and painted stucco. The development name will be sandblasted into cut sandstone. The signage for La Jolla Landing will conform to a contemporary neighborhood village theme. Warm and vibrant colors should be used in conjunction with integral color concrete CMU and stucco for project signage that compliments the building architecture.

PROJECT LANDSCAPING STANDARDS

The project landscaping for both La Jolla Groves and La Jolla Landing will meet the City requirements at the time of development.

The open space amenities for La Jolla Groves will include two open space turf areas, a ramada with two barbeques and benches and a picnic table, and meandering sidewalks. The landscape theme is one of lush desert landscaping with variations of green plants and complementary flowering plants to those found in the adjacent Erin Groves subdivision. The landscaping trees include acacia, date palm, mesquite, and oak. The proposed shrubs include bougainvillea, bird of paradise, cassia, honeysuckle, sage, ruellia, and oleander. Proposed accents and groundcover include yucca, deer grass, desert broom, morning glory, daisy, and lantana. The La Jolla Groves theme wall consists of single score split face block stained brown, light tan stucco finish, and a painted stucco mortar cap on the columns. Please refer to Appendix F for the landscape and wall plans.

The open space at La Jolla Landing should incorporate some of the following features: a shaded pedestrian footpath between pad buildings and major anchors, plaza areas for outdoor dining and/or entertainment, landscaped seating areas, landscaped pedestrian path between head-in parking stalls and building to provide a nice buffer typical of a neighborhood village theme. The amenities should be designed in such a way to enhance the shopping experience. Such amenities could include: decorative bench seating, decorative trash and ash receptacles, decorative pedestrian light poles near footpaths, landscape accent lights, outdoor seating for dining, architectural features such as canopy awning or tower element at the end of the drive entry to accent the corner, bike racks, and landscape pots. The parking screen walls constructed with the La Jolla Landing project shall match the La Jolla Groves theme wall.

The homeowners association established for this project will be responsible for the maintenance of the landscaping within the right of way and within open space landscape tracts. The developer will form a Maintenance Improvement District for this project.

INFRASTRUCTURE / UTILITIES

Olive Avenue is currently improved with pavement and curb and gutter. A sidewalk will be added along La Jolla Landing at the time of development. Ninety-fifth Avenue is currently improved with pavement. Additional pavement, curb and gutter, and sidewalk will be added along the project frontage at the time of development.

La Jolla Groves project will tie into existing water and sewer lines within the Erin Groves project to the south and into an existing waterline in 95th Avenue. The La Jolla Landing project will tie into existing water and sewer lines in Olive Avenue and 95th Avenue.

See Appendix E for a list of the utility service providers in the site vicinity.

CONCLUSION

The rezoning of the PC-2 to R1-8 allows for a more efficient use of that portion of land. The existing zoning of PC-2 extends approximately one quarter of a mile south from Olive Road. A PC-2 development on this zoned area would be sandwiched between the RV Storage and the R1-12 zoning. The rezoning to R1-8 allows a nice transition from Erin Groves located to the south and from the R1-12 lots located to the east. La Jolla Groves will act as a land use buffer and a transition between West Olive Farms. The rezoning will create the functional neighborhood community of La Jolla Groves.

The rezoning of La Jolla Landing will allow for a more efficient use of that portion of land. A conceptual site plan has been developed for the property depicting major stores, shops, pads, and parking. When developed, La Jolla Landing will provide convenient shopping for several of the surrounding neighborhoods.
